生产与质量控制（Production & QC）

Standardized production process fordenim jeans: Incoming fabrics andaccessories are inspected forcomposition and color fastness. Thecutting room arranges patterns on themarker and cuts layer by layer withaligned grain. The sewing line operatesin assembly style, with keyprocesses-chain stitching, bar tacking, and riveting-strictly controlled. Eachoperator conducts first-piececonfirmation and in-process sampling.Semi-finished products undergomid-inspection to remove loosethreads, skipped stitches, and sizedeviations. Finished garments gothrough a unified washing process, withpH and shrinkage rate monitored. Finalinspection checks appearance,hardware, and packaging against AQLstandards. Qualified products aresorted and stored with full batchtraceability.
